

Thank you for your purchase of the ZazaSlider feet! Using the most current technology, high quality raw materials, as well as tried and true design and fabricating techniques, these feet will last a lifetime and take your DIY project to the next level.

Best,  
-Zaza

## ***Assembly Instructions***

Included items:

- |                          |                          |
|--------------------------|--------------------------|
| (2) Center bar           | (4) 3/8" flathead screws |
| (2) Right foot assembly  | (4) 1/4" flathead screws |
| (2) Left foot assembly   | (1) 7/32" allen wrench   |
| (4) Thumb screws         | (1) 5/32" allen wrench   |
| (4) Quick adjust handles |                          |

The ZazaSlider feet center bar comes pre-drilled for both the 16-60mm and 10-40mm igus rail. Simply flip the bar for your rail size.

1. Place center bar on table with the countersunk holes for your rail size facing up
2. Place right foot assembly over the bar and insert (1) thumb screw to lock slide in place, leaving the center bar holes exposed.
3. Place left foot assembly over the bar and insert (1) thumb screw to lock slide in place, leaving the center bar holes exposed
4. \*Fasten complete foot assembly to your rail using the supplied flathead screws and allen wrench.

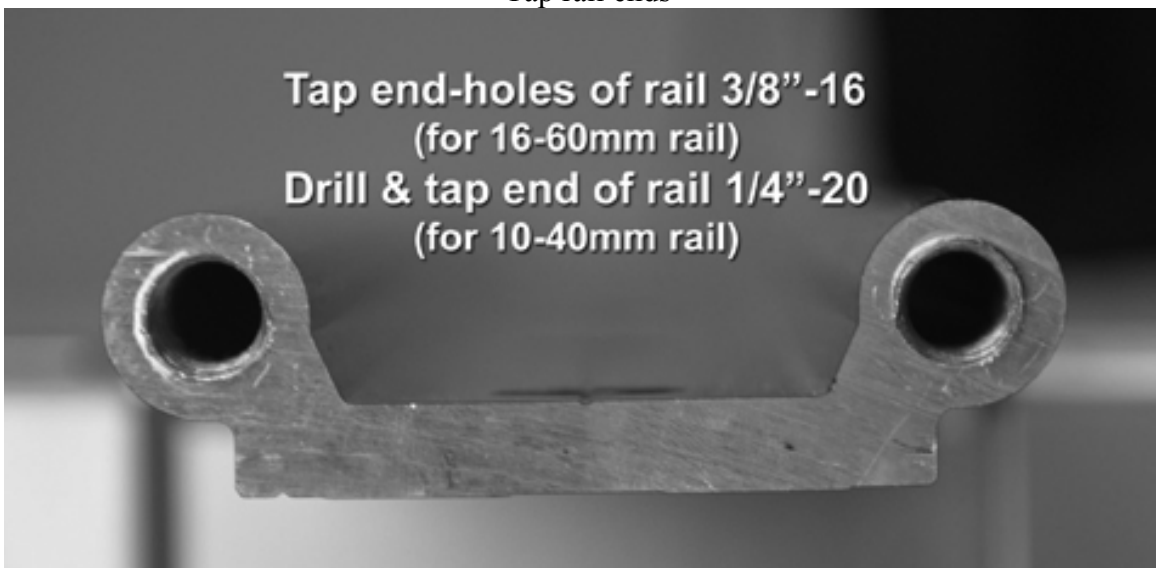

\* Please Note: 16-60 rail end holes have to be tapped 3/8"-16 and the 10-40mm rail end holes 1/4"-20

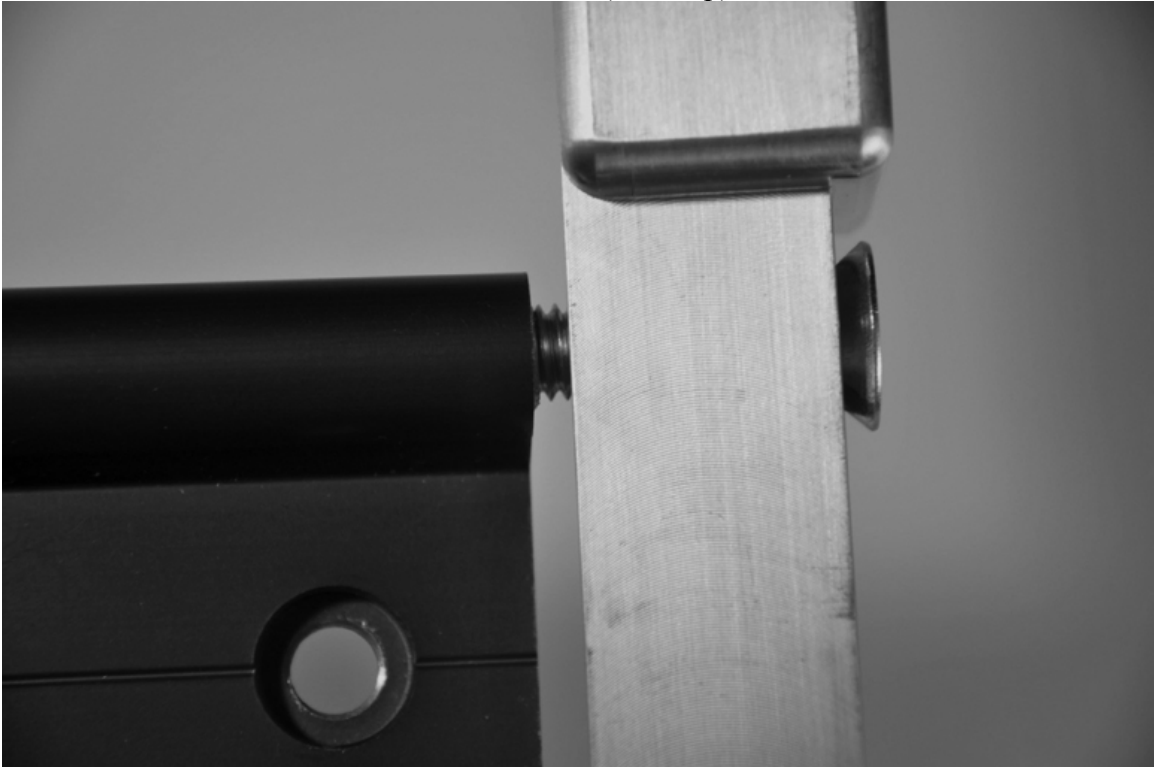

Finished assembly

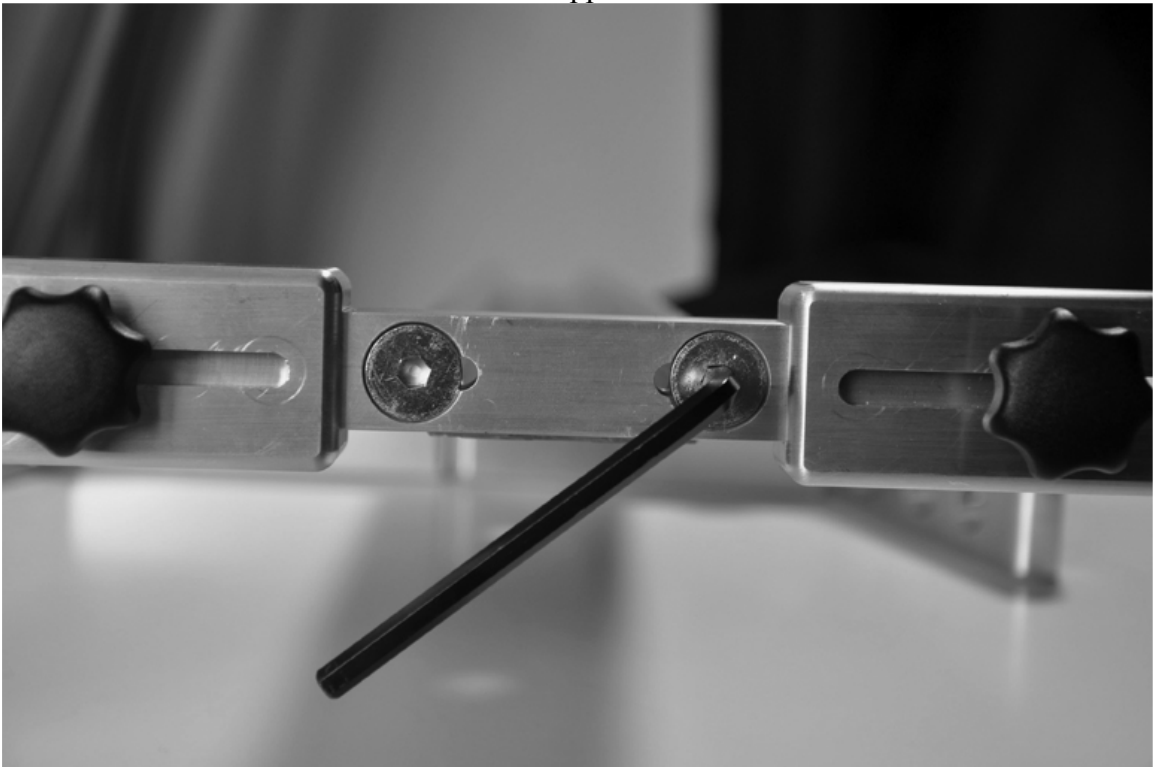

\*Tap rail ends

Attach to rail (close-up)

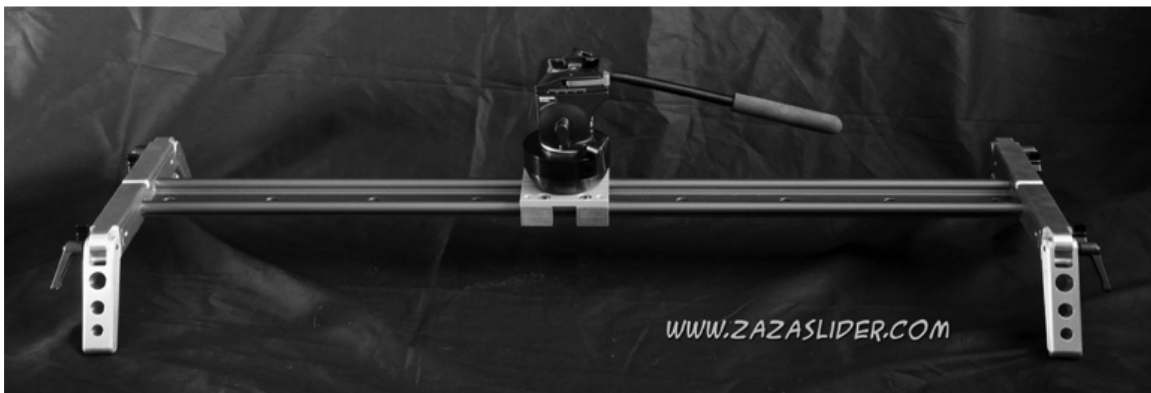

Attach to rail with supplied flathead screws

Attached to slider rail

Finished Slider!
